Target Elementary and junior high school students with foreign roots

## ★ The color of the Ikeda designated garbage bag for non-burnable garbage will change ★

We will change the bags color from green to transparent in order to ensure the safety of workers because the non-burnable garbage may contain items other than non-burnable garbage or hazardous materials. It is scheduled to be distributed from around August.

- There is no change in the number of designated garbage bags, price, etc.
- Both old and new bags can be used.

## ★ Request regarding the disposal of garbage ★

- (1) Baskets and buckets are easily blown away by the wind after garbage collection, so take measures such as tying them with strings or placing weights on them.
- (2) Please take out the waste **by 9 a.m.** on the day of collection  
(If you do it the day before, that may lead to an increase in garbage scattering damage.)
- (3) **Close** the garbage bag **tightly** (Do not put garbage in an amount or size that cannot be tied).
- (4) Collection workers can't enter the premises for collection, so please be sure to take it out in a place facing the road.
- (5) Do not put "empty cans / bottles" and "plastic bottles" in bags, but **put them out in containers like baskets** as they are.
- (6) Do not **put "plastic bottles" and "trays" in the same basket or bucket** (because they will be collected separately even if the collection date is the same).
- (7) "Soil, sand, and stones" can't be collected. So when taking weeds out, please remove the soil from the roots before putting them out.
- (8) Garbage is loaded by collection workers. Please do not put garbage directly by yourself into the collection car, as it is very dangerous.
- (9) Be sure to **open a hole** on the spray can after using it up.  
If it is difficult for you to do so by yourself, please contact the business center.
- (10) A garbage bucket with a lid is more effective in preventing damage to birds and animals from burnable garbage. As for crow repellent nets, it is effective to prevent entry through the gaps in the net with double or weight, and to put garbage firmly into the back of the net. By taking measures, the damage caused by litter scattering can make a big difference.

《Items with many mistakes in judgment》 We will inform you of the disposal method for items that are easy to make a mistake when separating garbage.

"Batteries, aluminum pots, pottery, glass cups"

○ **"Non-burnable garbage"** × Empty cans and bottles

⇒ Put it in a designated bag for non-burnable garbage. In addition, batteries must be insulated with tape after discharge, and then put in a designated bag in a transparent bag.

"Plastic bottle caps and labels"

○ **"Trays"** × Attached to Plastic bottles or removed but taken out with plastic bottles

⇒ Be sure to remove the cap and label and in a transparent or translucent bag.

"Lactic acid beverage container"

○ **"Trays"** × Plastic bottles

⇒ in transparent or translucent bags.

If you have any questions, such as the separating method or collection date, please contact the Business Center.
